

# **Humanizing yeast - towards engineering complex human systems in yeast**

The Kachroo laboratory ([www.kachroolab.org](http://www.kachroolab.org)) is looking for highly motivated and enthusiastic graduate students. We are a systems and synthetic biology group interested in engineering higher order human genetic systems in simplified cells like budding yeast. If you are interested, contact me via e-mail: [aashiq.kachroo@concordia.ca](mailto:aashiq.kachroo@concordia.ca)
